

Earth Science Class

Mrs. Deater

Class Description: The Earth's crust as well as its oceans, atmosphere, and near space environment all contain active processes that constantly produce change on Earth. In this class, we will actively examine what impact these processes have on our planet.

You will have to THINK in this room!!

Classroom Expectations:

1. Be respectful of both your teacher and other classmates.
2. Be prepared for class every day with a **PENCIL**, your textbook (always covered), your agenda (for assignments, lavatory/nurse), and a notebook. It would be helpful to bring a calculator along if you have one.
3. Treat school property and lab equipment in a mature and responsible manner. You will be responsible for any damage that you cause. Keep the classroom clean!
**Every class will take turns cleaning the classroom each week!*
4. **All** assignments must be completed in pencil, labeled with your name, class period, and date in the upper right hand corner.
5. Homework that is assigned will be randomly collected and graded. **Assignments will not be accepted late!**
6. You will earn a daily class grade of 2 points. It will reflect your behavior as well as your participation. This is your only chance to boost your grade for the marking period. There will be **no extra credit assignments**.
7. Any work that is missed due to an excused absence must be made-up promptly. **It is your responsibility** to schedule a time with me to do make-up work. When absent, check with a classmate if possible. Come into class and check the notebook of assignments to see what you've missed. Get any hand-outs you need, and turn-in any make-up assignments.
8. Academic integrity is very important to me, and should be to you. Although we will work together when gathering lab data, or working on projects, you are responsible for your own work. Cheating and/or copying homework is not acceptable. You will receive a zero for any non-original work, and your parents will be notified.

Do your best to succeed!!
